Subject: Re: From NPS.gov:

Hello,
At least seven bears have been hit by cars this year. There is now a sign in Yosemite Valley from a collision last week. I believe there are signs at other locations, but it's possible the wildlife management staff was too busy to place some of them during the last few weeks.

Several members of our Eastern Sierra Chapter #166501 Harley-Davidson HOG Club spent 3 wonderful days in Yosemite (20 - 22 June 2014) ... and we noticed no "SPEEDING KILLS BEARS" signs posted. Were they not yet set out ... or were we just non-observant ... ?
Thank you ... !
